# Type 600

# Ratio Relay Volume Booster

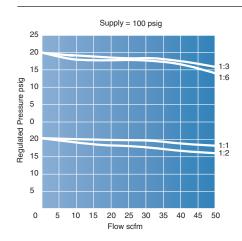

Meet high flow requirements with a low flow pneumatic signal.

The Type-600 ratio relay volume booster is designed to use a pneumatic signal to produce an output pressure which has high flow capacity and can be amplified. This unit is most useful for systems requiring the conversion of a low flow control signal to the higher flow requirements of an operating system. Using an independent supply pressure for greater volume, the Type-600 relays up to 50 SCFM flow capacity to a final control element such as a valve actuator. The standard signal to output ratio is 1:1, however, the Type-600 is also available with an amplified signal to output ratio of 1:2, 1:3 and 1:6.

#### FEATURES

- High Flow Capacity
   Allows flows up to 50 SCFM
- Amplified Output
  Available in a signal to output pressure ratio of
  1:1, 1:2, 1:3 and 1:6
- Stable Output
   Venturi aspirator maintains output pressure under varying flow conditions
- Balanced Supply Valve
   Rolling diaphragm design makes unit insensitive to
   supply pressure variation
- Optional Negative Bias 4 psi negative bias option allows "zero" of I/P's

### Flow Characteristics

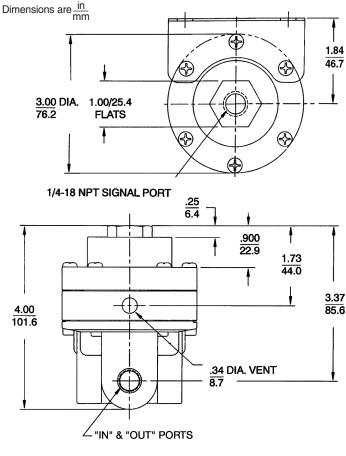

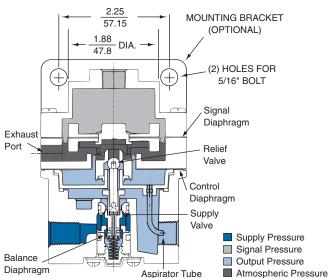

## **Applications**

The Type-600 is used extensively for increased flow capacity, pressure amplication, or remote pressure control applications. This includes web tensioning, roll loading, control valve acuators, I/P volume boosting, cylinder actuation, clutch and brake control, and gas flow control.

### Type 600 Dimensions

### PRINCIPLE OF OPERATION

When pressure is introduced through the signal port of the Type-600, a downward force on the upper diaphragm area is created. This force is balanced by the output pressure acting against the lower control diaphragm area. The ratio of signal pressure to output pressure is determined by the ratio of the effective areas of the upper and lower diaphragms. If signal pressure is increased above the output pressure there is a net downward force on the diaphragm assembly causing the supply valve to open. Output pressure increases until equalibrium is achieved. When signal pressure is decreased below the output pressure, the diaphragm assembly rises. allowing output air to exhaust through the vent on the side of the relay.

## Type 600 Specifications

Ratio	1:1	1:2	1:3	1:6
Flow capacity, SCFM (m3/hr) 100 psig (700 kPa) supply, 20 psig (140 kPa) output	50 (76.5)			
Exhaust capacity, SCFM (m3/hr)  Downstream 5 psig (35 kPa) above set pressure	15 (25.5)	15 (25.5)	15 (25.5)	10 (17.0)
Sensitivity, inches water (cm)	.25 (.64)	.50 (1.3)	.75 (1.9)	1.50 (3.8)
Ratio accuracy (%) - % of output span with 3-15 psig (0.21-1.05 BAR) signal	1.0	1.12	1.25	2.0
Zero error (%) - % of output span with 3-15 psig (0.2-1.05 BAR) signal	2.0	2.12	2.25	3.0
Effect of supply pressure change of 50 psig (3.5 BAR)	0.1 psi	0.2 psi	0.3 psi	0.6 psi
Max. supply pressure, psig (BAR)	250 (17.5)			
Max. signal pressure, psig (BAR)	150 (10.34)	75 (5.17)	50 (3.44)	25 (17.2)
Ambient temperature limits, °F (°C)				
Weight, lbs. (gm)	1.4 (6.35)			

### **Ordering Information**

Part Number	Port Size	Ratio
600-BA, 600-CA, 600-DA	1/4", 3/8", 1/2"	1:1
600-BB, 600-CB, 600-DB	1/4", 3/8", 1/2"	1:2
600-BC, 600-CC, 600-DC	1/4", 3/8", 1/2"	1:3
600-BD, 600-CD, 600-DD	1/4", 3/8", 1/2"	1:6

Options (Add proper letter at end of model number)

Z - Negative Bias: -4 ± 1 psi bias

E - Tapped Exhaust: Allows captured exhaust. 1/8" NPT port

U - 1/4" BSP Porting

#### **Accessories**

G - Pressure Gauge: 2" face, back mounted. Dual scale

0-15 psi range: P/N 446-725-003 0-30 psi range: P/N 446-725-004 0-60 psi range: P/N 446-725-001 0-160 psi range P/N 446-725-002

B - Mounting Bracket: P/N 446-707-025

#### Warranty

ControlAir, Inc. products are warranted to be free from defects in materials and workmanship for a period of eighteen months from the date of sale, provided said products are used according to ControlAir, Inc. recommended usages. ControlAir, Inc.'s liability is limited to the repair, purchase price refund, or replacement in kind, at ControlAir, Inc.'s sole option, of any products proved defective. ControlAir, Inc. reserves the right to discontinue manufacture of any products or change products materials, designs or specifications without notice. Note: ControlAir does not assume responsibility for the selection, use, or maintenance of any product. Responsibility for the proper selection, use, and maintenance of any ControlAir product remains solely with the purchaser and end user.
